

Osteoarchaeological Project

Basic human osteology, skeletal analysis and curation of human remains

Interested in learning more about human remains or need to practice your osteology skills?

Luton Culture is hosting one or two day human remains workshops as part of a project to further our understanding of health in and around Luton.

This is an ideal opportunity for students of archaeology and anyone that wants to learn more about osteology and human remains. Classes are limited to ten students to ensure maximum access to remains.

The day will include:

- identifying different bones and the layout of a human skeleton;
- learning how to clean, box, and curate remains;
- determining sex, age, and height of individuals;
- identifying different pathologies and the health of a person at death;
- using skeletal remains and other evidence to reconstruct life in different periods;
- reviewing the different stages of skeletal remains from burial, archaeological excavation, osteological study, curation or reburial.

Course dates

24–25 March 2012

5–6 May 2012 and 23–24 June 2012

**Venue: Stockwood Discovery Centre
London Road, Luton LU1 4LX**
